Safety

- ▶ Plato's <u>Emergency button</u> must be accessible from 360° at all times
- ▶ Do not use the <u>Double rectangular tray</u>, <u>Collecting tub</u> or any large accessories on Plato's <u>Top shelf</u>
    - ▷ Use ONLY the <u>Single tray</u> or the <u>Round Tray</u> on the <u>Top shelf</u>
    - ▷ Use the <u>Double tray</u> on the <u>Middle shelf</u> ONLY
    - ▷ Use the <u>Collecting tub</u> on the <u>Bottom shelf</u> ONLY
Make sure the accessory and its contents are stable before you begin delivering or collecting with Plato

Maximum load including accessories:
Top and Middle shelves: 10 kg each
Bottom shelf: 20 kg

► Distribute extra load so that lighter loads are on the upper shelves and heavier loads are on the <u>Bottom shelf</u>
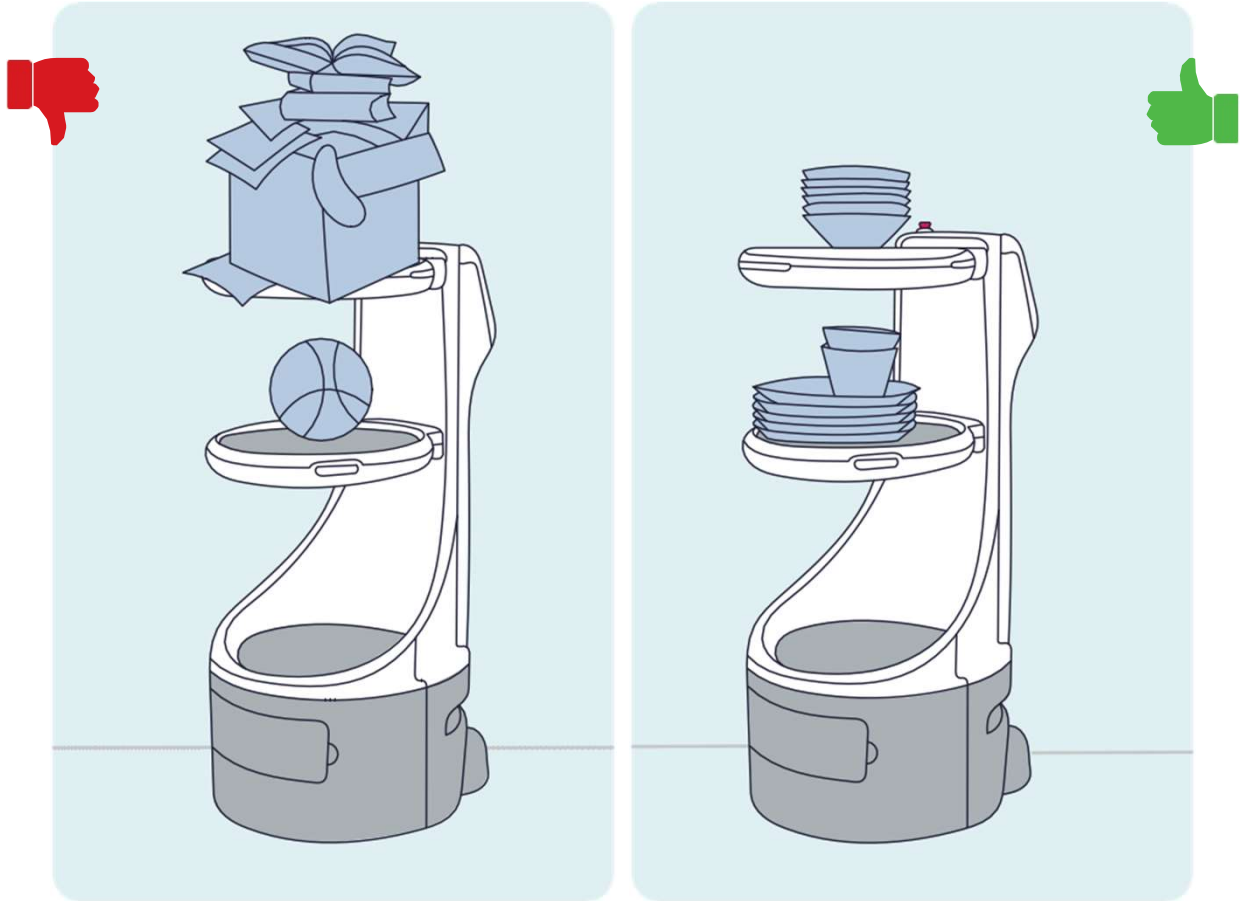

Food Contact

If an accessory below is not compliant with the Food Contact Directive, do not place unprotected food (pieces of bread, fruit with edible skin, etc.) directly on it.

	FOOD CONTACT
Single rectangular tray	NO
Double rectangular tray	NO
Anti-slip mat	YES
Round tray	YES
Collecting tub	NO
Collecting top cover	NO

Usage

You can increase the payload surface of Plato's shelves with easy to install delivery and collecting accessories.

Plato is stable and safe during navigation with loaded delivery and collecting accessories.

Clean Plato's delivery and collecting accessories with a soft dry cloth

> ⚠ **Please use dishes to deliver food with the Rectangular trays as they are not suitable for food contact.**

Installing the trays

Place trays on the dedicated shelves, no tools needed

Setting up Plato's weight sensors

When you use accessories, the weight sensors on each shelf need to be re-calibrated

► Go to Plato's <u>settings</u>

► Press the <u>Weight sensors</u> button

► Toggle the button <u>ON</u> to activate weighing

► Place empty accessories on the shelves and press the <u>Tare all shelves</u> button on <u>Plato's display</u> to calibrate
